

New **SRS** *Bridge-Buster*

Patent Number
US 6,450,427
US 6,978,956, B2

Bridge-Buster Benefits Include:

- Helps eliminate large runner bridging
- Eliminates downtime due to back-up and overflow caused by bridging
- Allows operator to use larger runners for regrind
- Maintains a consistent blend of regrind and virgin material
- Minimizes loss of regrind material
- Same granulator for both small and large runners

Eliminates **Large Runner Bridging**

The new, **SRS "Bridge-Buster"** is a force feed control system within the hopper that consistently forces large runners into the multi-stage cutting area. **Bridge-Buster** keeps production flowing smoothly and helps eliminate many of the problems associated with feeding large runners into an automated, regrind cutting system.
